

3-1. ABSO TOTEMS

Abso totems not only provide high quality sound comfort, but may also be used to organise open spaces by partitioning off quiet zones. In an instant, they turn rooms with hard floors or ceilings, like entrance halls, corridors, open space offices, meeting rooms or restaurants, into far more pleasant sound environments. They are also inventive decorative features and come in a wide range of inspiringly creative colours.

2,000 x 380 x 380 mm (including stand, depth: 65 mm)

ACOUSTICS

Equivalent absorption area of an object A (m²)

Frequencies (Hz)	125	250	500	1 000	2 000	4 000	5 000
totem 2,000 x 380 x 380 mm	1,51	2,81	3,14	3,27	2,99	3,09	2,98

Test report available on request – Standard NF EN 20354/ISO 354

TYPICAL SPECIFICATION SHEET
